

TURGINBAY BEKZAT ASANULY

Satbayev University Student | Software Engineering / Backend / Full Stack Developer

Almaty, Kazakhstan	+7 747 692 11 63 bekzattursi25nbai@gmail.com	GitHub: github.com/turginbay-dev
--------------------	---	-------------------------------------

PROFESSIONAL PROFILE

I am a motivated student at Satbayev University, developing in the areas of software engineering, backend, and full stack development. I am confident in Python and currently study information systems architecture, databases, backend logic, web development, as well as core disciplines such as Computer Networks, Operating Systems, and the fundamentals of system design. I do not limit myself to theory — I actively build my own projects and work with Git/GitHub, Linux, deployment, and real application development.

KEY SKILLS

Programming Languages	Python (confident level), JavaScript (basic/intermediate), C++ (basic level)
Web / Backend	HTML5, CSS3, responsive layout, Tailwind CSS, Django, backend logic, MVC/MVT structure, REST fundamentals
Tools and Platforms	Git, GitHub, Linux CLI, VS Code, Render, Firebase (Auth, Firestore, Storage), web application deployment
Fundamental Knowledge	Databases, SQL fundamentals, Computer Networks, Operating Systems, fundamentals of information systems architecture

PROJECTS

NaqUsta - marketplace application (Flutter + Firebase)

- Developed a service platform for interaction between clients and workers.
- Designed the structure of service categories and the logic for location-based filtering.
- Used Firebase Authentication, Firestore, and Storage.
- Worked on data architecture, actual chat functionality, and the overall product logic.

QazSound - music web platform (Django)

- Built a full stack web platform based on Django with backend logic and a user interface.

- Worked with routing, data processing, media integration, and project structure.
- Deployed the project to the Render platform with a production configuration.
- Paid attention to both the server side and the quality of the user interface.

EDUCATION AND LANGUAGES

Education	Satbayev University IT student Specialization: Software Engineering / software development
Languages	Kazakh - native language Russian - confident level English - A2-B1 level, actively improving

ADDITIONAL INFORMATION

- Interested in backend development, system architecture, and building real products that can be shown in a portfolio.
- I learn new technologies quickly, stay disciplined, independently master new tools, and can bring tasks to a result.
- Ready for an internship, practical experience, and working on real tasks in an IT team.
